ADMITTING PHYSICIAN	**ATTENDING SURGEON**	**DISCHARGE DISPOSITION**
Dr. Sarah Chen (Internal Med)	Dr. Sarah Chen, MD	Home (Routine Discharge)

DIAGNOSES & PROCEDURES

PRIMARY DIAGNOSIS	PROCEDURE PERFORMED
Acute Non-Perforated Appendicitis (ICD-10: K35.80)	Laparoscopic Appendectomy (15/10/2023)

HOSPITAL COURSE & TREATMENT SUMMARY

Presentation: Mr. Reed presented to the Emergency Department on 15/10/2023 complaining of a 14-hour history of severe right lower quadrant abdominal pain accompanied by nausea and low-grade fever. Abdominal CT scan confirmed acute uncomplicated appendicitis.

Hospital Course: The patient underwent an uncomplicated laparoscopic appendectomy under general anesthesia on the evening of 15/10/2023. Post-operative recovery was smooth and uneventful. Pain was well managed with IV analgesics transitioning to oral pain medications. Vital signs remained stable, and the patient successfully tolerated a regular solid diet by post-op day 1. Surgical port sites are clean, dry, and intact with no signs of infection. Patient is ambulating well and discharged in stable condition.

DISCHARGE PHYSICAL STATUS & VITALS

BLOOD PRESSURE	HEART RATE	TEMPERATURE	RESPIRATORY RATE	SPO2
122/78 mmHg	72 bpm	98.4 °F	16 breaths/min	99% Room Air

DISCHARGE MEDICATION PLAN

MEDICATION NAME	DOSAGE & ROUTE	FREQUENCY	DURATION	SPECIAL NOTES
Amoxicillin/Clavulanate	875 / 125 mg PO	Every 12 hours	5 Days	Take with food
Acetaminophen	500 mg PO	Every 6 hrs PRN	7 Days	For mild to moderate pain
Ibuprofen	400 mg PO	Every 8 hrs PRN	5 Days	Take with meals
Docusate Sodium	100 mg PO	Twice daily PRN	As needed	Stool softener post-op

POST-DISCHARGE INSTRUCTIONS & FOLLOW-UP

- **Wound Care:** Keep laparoscopic incision sites clean and dry. Inspect daily for redness, swelling, or drainage. Showering permitted after 48 hours; do not submerge in bath/pool.
- **Activity Restrictions:** No heavy lifting (> 10 lbs) or strenuous abdominal exercise for 2 weeks. Resume normal daily walking.
- **Follow-Up Appointment:** Surgical clinic review scheduled with **Dr. Sarah Chen** on **24/10/2023 at 10:00 AM**.
- **Warning Signs:** Return to the Emergency Department immediately if you develop fever > 101°F, severe worsening abdominal pain, persistent nausea/vomiting, or severe redness at incision sites.
